DETAILED ACTION

Response to Arguments

The examiner notes the terminal disclaimers submitted in this application regarding its relationships to patent 6,568,683 and applications 10/031,776, 10/031,942, and 10/497,428. The fees have been paid and the disclaimers have been accepted by the TC3700 special programs examiners. Corresponding terminal disclaimers need to be filed in the other applications, since the double patenting involves more than two applications (MPEP 804 (I)(A)(1), 3rd paragraph). The examiners of the other applications will be made aware of the double patenting issues.

The examiner finds that the amendments made to Claims 3 and 4 remove all 112 issues, putting them in condition for allowance. The examiner also notes the supplemental ADS filed, properly claiming priority to British applications 9919551.3 and 9929210.4. With the exception of the minor informalities to the specification, the application is in condition for allowance.

Ex Parte Quayle

This application is in condition for allowance except for the following formal matters:

1. The disclosure is objected to because of the following informalities: On Page 1, "...approximately once a *weak*..." should be "approximately once a *week*..." On Page 2, "...the games manager *3controls*..." should be "the games manager *controls*..." On

Page 4, "...where each move *involve*..." should be "where each move *involves*..." On Page 5, "...never *change* unilluminated points..." should be "...never *changing* unilluminated points..."

2. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
